JOURNAL OF ELECTRON SPECTROSCOPY AND RELATED PHENOMENA

VOLUME 42 (1987)

Subject Index

AES
on the relation between XPS and AES relaxation energies in metals 161
Al
matrix elements in appearence potential spectroscopy of Al and its alloys 27

benzenethiol
angle-resolved polarization-dependent photoemission spectra of benzenethiol adsorbed on Cu(110) 313

carbon
carbon *K*-shell excitation spectra of linear and branched alkanes 11
carbon films
attenuation lengths of low-energy electrons in free-standing carbon films 171
carbonyl acetylene compounds
the He(I) photoelectronic spectra of some conjugated carbonyl acetylene compounds, HC≡CC (O)X, X = H, F, Cl, OH, CH_3 149
channel electron multiplier
quantitative AES: the problems of the energy dependent phase shift and modulation amplitude and of the non-ideal behaviour of the channel electron multiplier 255
concentration gradients
influence of concentration gradients and surface roughness on measured reduced thicknesses of overlayers 61
cyanomethanes
interpretation of the ionization spectra of the cyanomethanes 245

deconvolution
deconvolution in electron spectroscopy revisited: computational aspects 329

ESCA microscope
ESCA microscope — a new approach for imaging in XPS 359

GaAs surfaces
adsorption of oxygen on clean GaAs surfaces investigated by ultraviolet photoemission 73
Gaussian/Lorentzian mixed function
application of asymmetrical Gaussian/Lorentzian mixed function for X-ray photoelectron curve synthesis 177

glide symmetry
electron spectroscopies of adsorbate structures with glide symmetry 217

H_2S
final state multiple structures in photoionization of the inner valence shell of H_2S: angular distribution in the 40–70 eV photon energy range 1

IT–HfS_2
angle resolved photoemission from IT–HfS_2 275

Kikuchi bands
single-scattering-cluster description of substrate X-ray photoelectron diffraction and its relationship to Kikuchi bands 187
$La_{0.7}A'_{0.3}MnO_3$ catalysts
$La_{0.7}A'_{0.3}MnO_3$ catalysts by MS-$X\alpha$ and CNDO/2 methods 293

many body theory
many body theory of the Coster–Kronig satellite spectrum 271

N_2O
momentum transfer dependence of the $(6\sigma)^2 \rightarrow (6\sigma, np\pi)$ window in N_2O 67
Ni_2Si
local structure of Ni_2Si 287

phosphorus
gas phase phosphorus 1*s* and 2*p* binding

energy and Auger shifts in some polarizable phosphorus compounds 49
photoelectron intensity
effect of the analyser acceptance angle on the photoelectron intensity 235

rare earth metals
partial photoionization cross-sections at the 3*d* thresholds of rare earth metals 89
rhenium surface
core level binding energy shifts of rhenium surface atoms for a clean and oxygenated surface 305

silicate minerals
Fe 2*p* spectra of silicate minerals 97
spin-coupled theory
the interpretation of binary (*e*, 2*e*) spectroscopy using spin-coupled theory 127
substrate line shape
perturbations in applied electron spectroscopy caused by the vicinity of the surface. Part I. A descriptive model of the substrate line shape 107
sulfur
relativistic corrections to reported sulfur 1*s* ionization energies 281
surface roughness
influence of concentration gradients and surface roughness on measured reduced thicknesses of overlayers 61

XPS
on the relation between XPS and AES relaxation energies in metals 161

zirconium surfaces
electronic excitations and their relaxations in clean and oxidized zirconium surfaces measured in EELS 351
Zn (0001)
UPS study of methanol adsorption on oxygen-covered Zn (0001) 183
Zn metal
the $L_{2,3}$-*MM* Auger-electron spectrum of Zn metal: influence of correlation effects 39
